M100 MLRS

Extend your living space outside with the M100

The MYT M100 MLRS (Motorised Louvre Roof System) consists of tilting Aluminium louvres which are operated by a remote control. You can control how much light or shade you create for your outdoor space. Raining? No problem, with the rain sensors the blades will fully close and our special water drainage channel ensures you will stay dry.

Remote controlled

LED Lighting and/or spot lights

Integrated water drainage

Wind, rain, snow sensor

2 standard colours
